

Following the injections you have received today you may experience some mild discomfort. This is a normal part of the healing process and should subside with time and wearing the compression gloves. You may take Advil, Nuprin, or Aleve for any pain or discomfort that may be present. Avoid hot tubs, whirlpools, saunas and heated swimming pools. Sun exposure should be avoided for at least 2 weeks following treatment. Use sunscreen at all times when in the sun. After the dressing is removed, you may apply lotions as desired.

We will place compression wraps after your procedure. We will ask you to wear these continuously for the first 24 hours. You may adjust the bandage as needed to avoid numbness in the fingers. After 24 hours, the gloves must be worn every day for a minimum of 4-6 weeks. They may be removed intermittently as necessary. The more of an opportunity you have to wear the gloves, the better the results you will experience.

Typically, the injected areas may be sensitive and swell slightly. The area may look black and blue or bruised. The small vessels may change color. This discoloration is normal and will disappear as the healing process takes place. None of this should cause alarm.

On larger vessels, some lumps may form along the treated veins. These lumps may take 4 weeks to 6 months to resolve. If tenderness/redness/lumpiness persists, please contact us. You may have some redness, hardness and tenderness along the vein route. You may also feel a pulling or tight sensation along the vein. These responses to the injections are normal. Many patients go through the treatment with almost none of these reactions at all. These responses to treatment are not serious, harmful, or dangerous and are only temporary in duration.

Remember, it has taken years for these veins to develop, and they will not disappear overnight. Be patient and allow time for healing to occur. You can expect to see beneficial results in 6 to 8 weeks.

Please call the Vein Center if you experience persistent pain, bleeding, extreme swelling, fever or chest pain: 516-869-VEIN (8346).

ALWAYS BRING YOUR GLOVES WITH YOU TO THE OFFICE.
